

**Track 10. Communication and Information Security**

With the rapid development of information technology, communication and information security issues are becoming increasingly prominent. How to improve network information security to protect users' personal privacy rights and prevent information leakage and abuse is crucial to be considered from multiple levels including the physical layer, network layer and application layer etc. This track will focus on the latest research in the field of network communication and information security.

**Topics**

- ▶ Communication privacy and anonymity
- ▶ Information system security and management
- ▶ Information security algorithms and protocols
- ▶ Intelligent communication/information security
- ▶ Application of Blockchain in information security
- ▶ Network privacy protection and management
- ▶ Security breaches and attack monitoring
- ▶ Encrypt communications
- ▶ Optical physical layer security

**Track Chairs**

**Cheng Huang**  
Fudan University, China

**Mingzhou Yang**  
Shenyang University of Technology, China

**Kuan Zhang**  
University of Nebraska-Lincoln, USA
